Q1: WORDS/MEANING:

S.No	Words	Eng-Meanings	Urdu Meaning
1	Longitude	Vertical Lines from north to south on a map	طول البلد
2	Latitude	Horizontal Lines from east to west on a map	عرض البلد
3	Compass	A Device used to determine directions	قطب نما
4	Equator	An imaginary line around the middle of earth	خط استوا

Q2: Questions / Answers:

i. What is the difference between a globe and a map

S.No	Globe	Map
1	A Globe is a round model of the Earth	A Map is the flat drawing of the Earth
2	A Globe shows the true shape and size of continents	A map may vary in shapes and sizes of continents
3	A Globe cannot show full details	A map can show more details
4	A Globe is hard to carry.	A map is easy to carry

ii. **What are the main elements of a map?**

A: The Main elements of a map are:

- (a). Title (b). Symbols (c). Scale (d). Legend
(e). Directions (f). Longitude and latitude

iii. **How do the lines of longitude and latitude help to locate on area on a map?**

A: Latitude lines run from east to west and longitude lines run from north to south. The point where they cross shows the exact location of an area.

iv. **Define the following terms:**

- (a). Continent (b). Compass rose (c) Equator (d) Meridians

• **Continent:**

The large land masses on the Earth's surface surrounded by sea are called continent.

• **Compass rose:**

A compass rose is a symbol on a map that shows directions such as East, West, North and South.

• **Equator:**

The equator is the measuring point for the latitude. It is an imaginary line of latitude.

• **Meridian:**

Lines of Longitude from the top of the earth to the bottom, run from the North Pole to the South Pole. These lines are also called meridians.

Q3: Fill in the blanks:

- i. The symbols represent the **geographic** features on a map.
ii. **Map** is a drawing of earth's surface or part of it.
