4	Preserved	Keep in safety	محفوظ
5	Substance	Physical matter or material	مادہ
6	Wastefulness	Using more than needed	فضول خرچی

Q2: Short Questions/Answers:

i. What are natural resources?

A: Natural resource are found in nature that are useful to us. Such as light, air, water, trees, land, soil, animals etc.

ii. Give some examples of minerals?

A: Copper, gypsum, iron and zinc are some examples of minerals.

iii. How many types of natural resources?

A: Natural resources are of two types: renewable and non-renewable.

Q3: Long Question/Answers:

i. What is the difference between renewable and non-renewable natural resources?

	Renewable Resources	Non-Renewable Resources
1	Renewable resources can be replaced and regenerated by nature, e.g. sunlight, water, air and trees.	Non-Renewable resources cannot be replaced once they are used up, e.g. petroleum, gas, coal and minerals.

ii. Suggest some ways to save natural resources?

A: There are some ways to save our resources.

- Forests must be preserved. Trees should not be cut unless necessary.
- Water must not be wasted.
- Rubbish should not be thrown on land.
- Electricity must be saved. Lights must be switched off when there is nobody the room.
- Air should be kept free from pollution.

iii. What resources are scientists using now to generate electricity?

A: Scientists are now using renewable resources like sunlight, wind and ocean waves to generate electricity.

iv. What does Allah say in the Quran about wastefulness?

A: Islam discourages wastefulness. Allah does not like those who practice wastefulness. They are like the brothers of Satan.

v. What lesson did you learn from the chapter Natural Resources?

A: Allah has made this beautiful Earth for us. The Natural resources are a blessing from Allah. We should use them wisely, avoid wastefulness, and always be thankful to Allah.
