Ans: Organ system is an organized system in which two or more organs participate.

4. How many organ systems are in our body? Name important system.

Ans: There are almost 22 organs system in the body. The most important are:

- Digestive system
- Reproductive system
- Nervous system
- Circulatory system
- Muscular system
- Skeletal system

Q: True or False:

1. Skin covers whole structure of the body. (True)
2. Cell is the tiny living unit. (True)
3. There are more than 500 types of cells in our body. (False)
4. Several cells together make up tissues. (True)
5. There are almost 33 organ system in the body. (False)

Activity # 01

(This activity will be done in book pg # 20)

1. I support bones to move. I am your Skeletal system
2. I help is digestion of food. I am your Digestive system.
3. I process respiration. I am your Respiratory system .
4. I keep circulating blood in your body. I am Circulatory system.
5. I have control on all systems through signals. I am your Nervous system

Activity # 02

(This activity will be done in book pg # 16)
