

AL-SUFFAH ACADEMY

2ND MONTHLY PLANNERS

CLASS: IV

SUBJECT: MATHS

WEBPAGE

RULES OF DIVISIBILITY:

Rule I	Rule II	Rule III	Rule IV
The number with 0, 2,4,6,8 at the unit place divisible by 2.	If the digits of any number add up to a number which is divisible by 3, then the original number is also divisible by 3.	Any number with "0" or "5" at the unit place is divisible by 5.	Any number with 0 at the unit place is divisible by 10.

EX: 2A PAGE NO:27

Q1: Fill in the Blanks:

a: 5 b: 2 and 3 c: 2, 5 and 10 d: 3 e: 2

Q2: State whether has following are (True or False)

a: True b: True c: False d: True e: False

Q3: State the correct answer from given option:

a: 2 and 3 b: 2, 5 and 10 c: 5 and 3 d: 5 or 0 e: 5 and 3

Q4: Which of the following numbers are divisible by 2? (do part f, g & h)

a: 200:

Solution: 200 is and even numbers: it is divisible by 2.

b: 427:

Solution: 427 is not an even number: it is not divisible by 2.

Q5: Which is the following Numbers divisible by 3? (do part c & d)

a: 624:

Solution: Add the digits: $6+2+4=12$ 624 is divisible by 3.

b: 2358

Solution: Add the digits: $2+3+5+8=18$ 2358 is divisible by 3.

Q6: Which of the following are divisible by 5? (do part c & d)

a: 2900

Solution: Yes, 2900 is divisible by 5. Because it has 0 at the unit place.

b: 6954

Solution: No, 6954 is not divisible by 5. Because it has 4 at the unit place.

Q7: Which of the following number divisible by 10? (do part c & d)

a: 7281

Solution: No, 7281 is not divisible by 10. Because, it has 1 at the unit place.

b: 81080

Solution: Yes, 81080 is divisible by 10. Because it has 0 at the unit place.

EX: 2B PAGE NO:32

Q1: Fill in the Blanks:

a: Two

b: Two

c: 1

d: composite

e: 2

Q2: State whether has following are true or false:

a: false

b: false

c: True

d: True

e: False

Q3: State the correct answer from the given option:

a: 2

b: More than two factors

c: 29

d: prime number

e: composite

Definitions:

- **Prime Numbers:**

A prime numbers has only two factors.

- **Co-Prime Numbers:**

There is only one common factor.

- **Composite Numbers:**

All others numbers (Except the number 1) have three or more different factors called Composite numbers.

**Q4: Check whether the number given in the table below are prime or composite:
(in Book)**

A	composite	b	prime	c	Composite	d	composite	e	composite
F	composite	g	prime	h	Prime	i	prime	j	prime
K	composite	l	prime	m	composite	n	composite	o	composite
P	composite	q	composite	r	prime	s	composite	t	prime

Q5: Which of the following are co-prime numbers: (do part g & h)

i. 3 and 5

Solution: Factors of 3 = $\boxed{1}$, 3
Factors of 5 = $\boxed{1}$, 5
C.F = 1

Yes, 3 and 5 are co-prime numbers.

ii. 4 and 9

Solution: Factors of 4 = $\boxed{1}$, 2
Factors of 9 = $\boxed{1}$, 3, 9
C.F = 1

Yes, 4 and 9 are co-prime numbers.

iii. 12,9

Solution: Factors of 12 = $\boxed{1}$, 2, 3, 4, 6, 12
Factors of 9 = $\boxed{1}$, 3, 9
C.F = 1

EX: 2C PAGE NO:32

Q1: Fill in the blanks:

a. One b. 1,2,3 and 6 c. 2 d. 20 e. Prime

Q2: True or False:

a. False b. True c. True d. True e. False

Q3: State the correct Answers:

a. 14 b. 32 c. 1,2,5,10,25 and 50 d. 2 e. 1

Q4: Find the factors of the following numbers:

a. 9

Solution: $9 \div 1 = 9$ Rem 0
 $9 \div 3 = 3$ Rem 0
 $9 \div 9 = 1$ Rem 0
Factors of 9 are 1,3,9.

b. 11

Solution: $11 \div 1 = 11$ Rem 0
 $11 \div 11 = 1$ Rem 0
Factors of 11 are 1 and 11.

Q5: Write down the factors of these numbers: How many factors does each number have:

a. 25

Solution: Factors of 25: 1,5,25
25 have 3 factors.

b. 36

Solution: Factors of 36: 1,2,3,4,6,9,12,18,36
36 have 9 factors

Ex:2d page no:38

Q1: Fill in the blanks:

- a. 30 b. 41 c. Two d. 2 and 5 e. Composite

Q2: True and False:

- a. True b. false c. True d. True e. False

Q3: State the correct answers:

- a. 135 b. 2,5,11 c. 5
d. Prime number e. Expressing a number into the product of its prime factor

Q4: Draw factors trees to show the prime factors of the given numbers:

EX: 2E PAGE NO:42

Q1: Fill in the blanks:

- a. 1 b. 4 c. 2,4 and 8 d. 2 e. 6

Q2: State whether has following are (True or False)

- a. False b. False c. False d. True e. False

Q3: State the correct answers from the given option:

- a. 7 b. 26 and 52 c. 81 d. 1,2,13 and 26 e. 5

Q4: Write the factors of these numbers (pairs) and circle the common factors.

a. 10, 18

Solution: Factors of 10 : 1, 2, 5, 10
Factors of 18 : 1, 2, 3, 6, 9, 18
C.F = 1,2

EX: 2F PAGE NO:50

Q1: Fill in the Blanks: (Ex 2f)

- a: 60 b: 4 and 9 c: 30,60,90 d: 9,18 and 27 e:10,20,30,40

Q2: State whether has following are True and False:

- a: True b: False c: True d: True e: False

Q3: State the correct answer from the given option:

- a: 7 b: 12 c: 5 d: 15,30,45 and 60 e: 2 and 4

Q4: Find the first 3 common multiples of this pairs of numbers: (do part c & d)

a: 18 and 24

Solution: Multiples of 18= 18, 36,54,72,90,108
Multiples of 24= 24,48,72,96,120,144
C.M are: 72,144,216

b: 12 and 16

Solution: Multiples of 12= 12,24,36,48,60,72,84,96,108

Multiples of 16= 16,32,48,64,80,96,112,128,144

C.M are: 48,96,144

WORDS PROBLEMS:

1. What is the least number of children, who may be arranged in rows of 12,15 and 9?

Solution:

2	12
2	6
3	3
1	

5	15
5	5
	1

3	9
3	3
1	

P.F of 12 = $2 \times 2 \times \boxed{3}$

P.F of 15 = $\boxed{3} \times 5$

P.F of 9 = $\boxed{3} \times 3$

LCM of 12,15 and 9 is $2 \times 2 \times 3 \times 5 \times 3 = 180 = 180$ children's.

2. Arif brought 40 chocolates bars and 60 Marshmallows to distribute among his friends on his birthday. Find the maximum numbers of students to whom he can divide the sweets evenly.

Solution:

We have to divide 40 chocolates and 60 marshmallows. So we will find HCF.

2	40
2	20
2	10
5	5
	1

2	60
2	30
3	15
5	5
	1

P.F of 40 = $\boxed{2} \times \boxed{2} \times 2 \times \boxed{5}$

P.F of 60 = $\boxed{2} \times \boxed{2} \times 3 \times \boxed{5}$

HCF = $2 \times 2 \times 5 = 20$

= 20 Students
