Question /Answers

Q01: What are widgets? Give an example of a widget and state its function.

Ans: Widgets are small tools or apps that provide information without opening the app. A calendar widget shows the current date and month on the screen.

Q02: Draw the widget you would like to create for the window operating system?

Q03: What devices most widely use the android system?

Ans: Android is mostly used in smartphones and tablets.

Q04: Explain the functions of iCloud?

Ans: iCloud stores photos, files, and backups. You can access them from any Apple device.

Q05: Define a User Interface?

Ans: A User Interface (UI) shows how to interact with a computer or app, using buttons, icons, and menus.

Q06: Why is the desktop an essential feature of any computer?

Ans: The desktop is an essential feature because it helps you organise files, open programs, and manage your computers tasks.

"Activity" Choose the correct answer: (Pg: 10)

- d) **Desktop** is a computer display area on the monitor.
- e) A Hard Disk Drive (HDD) is an **Internal** storage device.

"WORK SHEET"

Now write the functions of each of these features.

Feature	Function
Windows Icon	Located at the bottom left corner of the screen. Clicking this icon opens the start menu, providing access to apps, settings, and power options.
Search Box	Found next to the Windows icon, it allows you to search for files, apps, settings, and even perform web searches directly from the task bar.
My Documents	A default folder in File Explorer where you can store and organise your personal documents. It's part of the Libraries feature in Windows.

Desktop	The main screen area that you see after logging in. It can hold shortcuts to files, folders, and applications, and you can customize it with wallpapers and widgets.
Taskbar	Located at the bottom of the screen, it shows open applications, pinned shortcuts, the system tray, and the notification area. It also includes the Start menu and Search box.
Calendar	Integrated into the system tray, it provides quick access to your calendar and events. You can view and manage your schedule directly from the taskbar.
Recycle Bin	A special folder where deleted files are temporarily stored. You can restore files from the recycle Bin or permanently delete them to free up space.
Start Menu	A central hub for accessing applications, settings, and power options. It includes a list of installed apps, live tiles for quick access, and shortcuts to important system functions.
